

## ASC items 2 & 3

80% of infants with normal hearing  
have mastered these two items  
between birth and 12 months

Tyberg, 2012

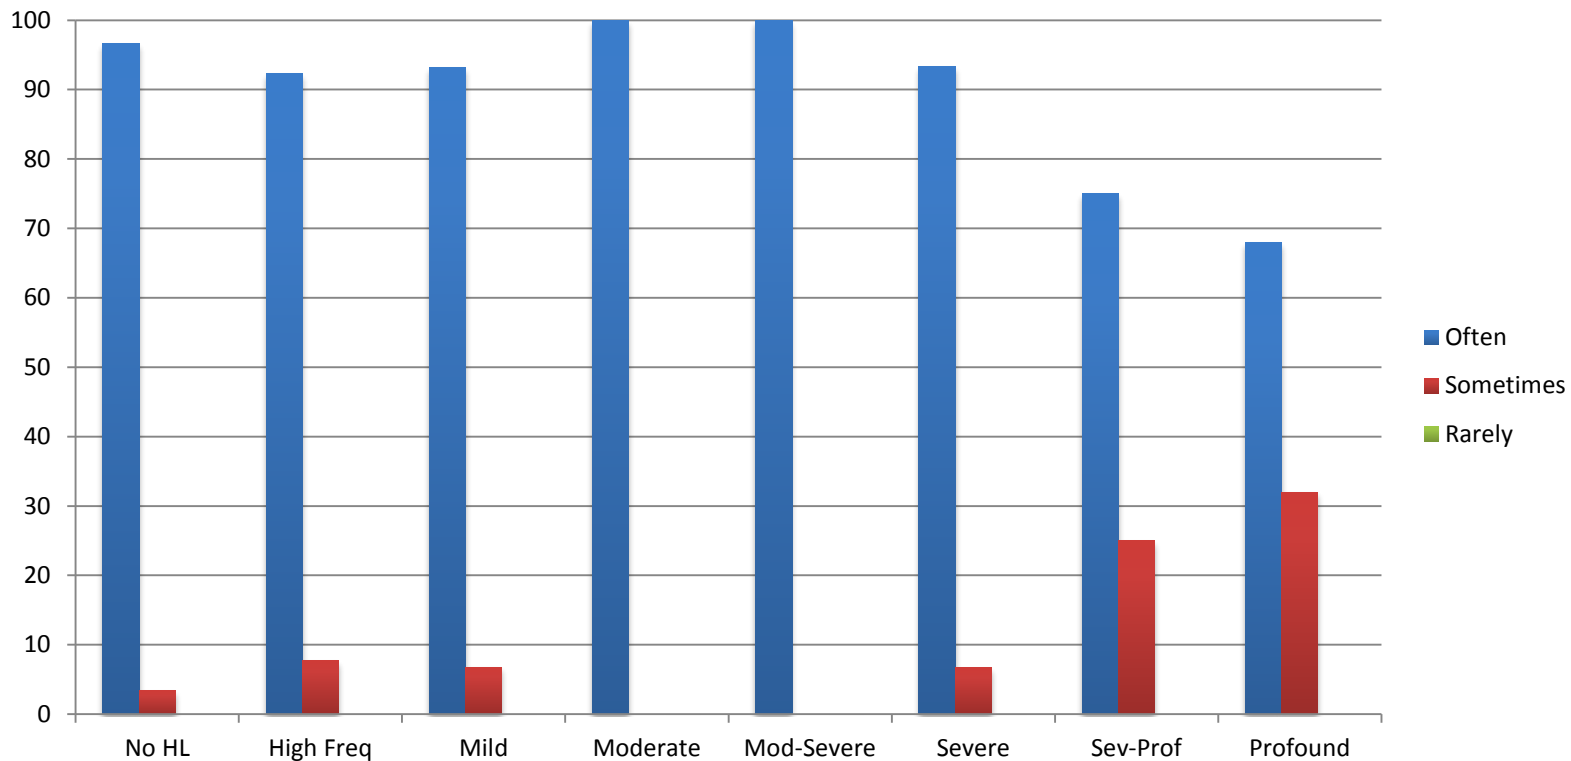

- Item 2: Does your child use body language to indicate when something is heard (for example: turns head, eye widening, quiets, stops action, changes facial expressions)?
- Item 3: Does your child show awareness (alerts or quiets in response to loud sounds, turns to the sound source) to loud environmental sound (for example: a dog barking)?

Tyberg, L., Beams, D., Sedey, A. & Yoshinaga-Itano, C. (2013)  
Item 2: Does your child use body language to indicate when something is heard (for example: turns head, eye widening, quiets, stops action, changes facial expressions)? (NH)

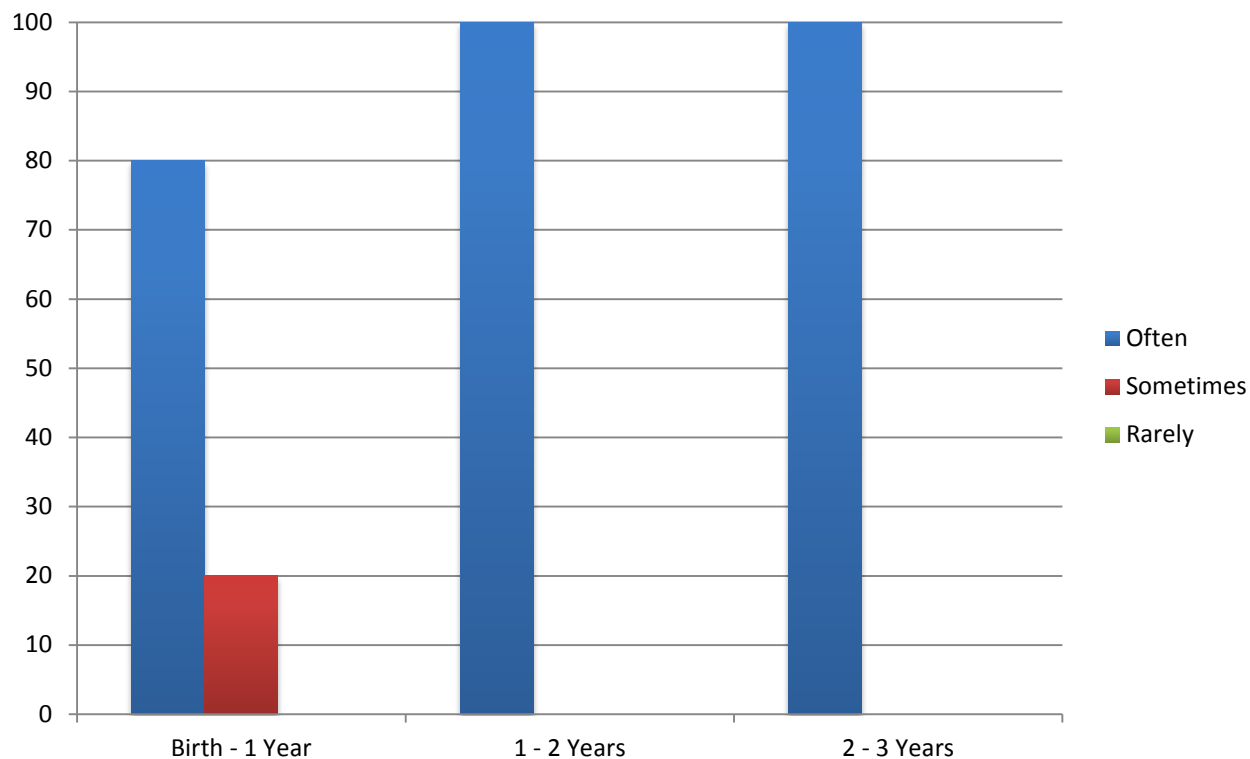

# Question 2 (Meagher et al., 2013, DHH) 27 months – 36 months

- Does your child use body language to indicate when something is heard?

Tyberg, L., Beams, D., Sedey, A. & Yoshinaga-Itano, C. (2013)  
Item 3: Does your child show awareness (alerts or quiets in response to loud sounds, turns to the sound source) to loud environmental sound (for example: a dog barking)? (NH)

# Question 3 (Meagher et al., 2013, DHH) 27 to 36 months of age

- Does your child show awareness of loud environmental sounds?
